Dear Ms. Roth:

Re: Request for Schedule Extension for Reports;
Terminal 91 Tank Farm Site Agreed Order No. DE 98HW-N108

This correspondence serves as official approval by the Washington State Department of Ecology (Ecology), for the schedule extension as requested in your April 20, 2004 letter. This approval only applies to an extension of the submittal dates for these Terminal 91 deliverables:

- The Draft Bridge Document Report 3 is now due on or before May 10, 2004.
- The first Quarter 2004 Status Report is now due April 26, 2004.

This extension should not affect the deliverable date for "The Draft Proposal for the Pier's Seepage Evaluation Method" which is due on or before May 19, 2004. In addition, I would like to use this opportunity to remind you that we still need to finalize the final addendum to the Soil Vapor Work Plan. We would prefer to review a proposed schedule with due dates for finalizing the addendum and beginning the fieldwork as soon as practicable. It is Ecology's expectation that responses to Ecology's comments and a schedule proposal be submitted no later than June 1, 2004.

If you have any questions or comments, please contact me at the Department of Ecology Northwest Regional Office by phone at (425) 649-7280 or by email at gttri461@ecy.wa.gov.

Sincerely,

Galen H. Tritt
